

GTCTM
Control Solutions

A DIVISION OF AP4 GROUP 

LONGEVITYTM PROGRAM

No unnecessary forced upgrades

*Safe supply of Spares, Repairs and Services,
including Field Service and Training*

*Exceptional Warranty terms for
Spares and Repairs*

*You will never pay
"money for nothing"*

The OEM says your equipment is "Obsolete" and wants you to upgrade.

GTC calls it "Classic" with the ability to operate safely and reliably for as long as you need.

With our LongevityTM Program, operators secure the continued reliability of their original systems through GTC's supply of Spares, Repairs and Services for their Turbine Controls, Excitation, Vibration Monitoring, Fire Protection, LCI, Flame Scanners, and HMI's.

GTC will recommend the critical spares you should store based on our signature Pareto Analysis (80/20 Rule) for controls.
